Sign up for Project NAVIGATE’S RNR 140 -  
Introduction to Geospatial Concepts and Naval Applications

Spring 2017  
1-Unit  
Friday 0800-0850

In Project NAVIGATE you will:

Be able to use GIS, geospatial software, data and imagery from satellites and other sensors to create National defense oriented maps and geospatial projects.

Learn how to become the next generation of naval scientists and engineers.

Network with veterans, industry, military and government professionals.

Be eligible to earn a trip to Washington, DC.
