- To return back to the computer screen, press the COMPUTER button on the PROJECTOR remote again.
- REMEMBER to remove your DVD and power the player off when finished
Helpful Troubleshooting Hints:

- PROJECTOR NOT DISPLAYING: Press the computer button on the PROJECTOR remote so the projector can cycle through and find the computer or Elmo.
- NO SOUND: Speaker volume is not controlled by the computer, use the VOLUME controls on the SPEAKER box to adjust volume and make sure it is powered on.
- DVD or VCR not working: Make sure you are logged in and can see the computer screen on the projection screen. Then once you have inserted either you DVD or VHS, use the VIDEO button on the PROJECTOR remote to force the projector to cycle through and find the device.
- ELMO KEEPS CUTTING OUT: Make sure the power cord is securely in place on the back of the unit. Often times from movement of the card, it tends to loosen or come out.
