

What Did U Learn 2Day?

Objective: Students will be able to create three interview questions. Students will also be able to interview a peer following interview etiquette.

Overview: Students may not know what they want to be yet. However, you should always take into consideration how others got to where they are today. The students have just participated in one of the two different tours at University Medical Center and Department of Fine Arts. This activity gives them a chance to practice their interview skills with their peers to learn what the other tour was like.
